EXPERIMENT-7

NAME: SANTHOSH KUMAR N **ROLL NO: 240701807**

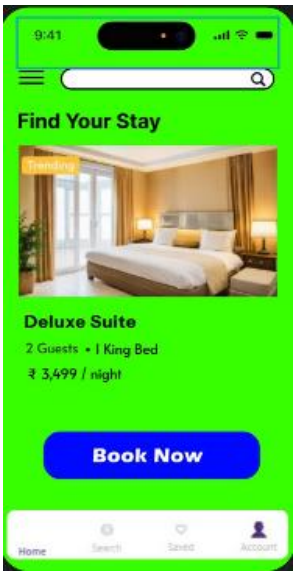
AIM:

To design and compare different Hotel booking mobile app layouts using GIMP and evaluate user feedback on aesthetics and usability.

PROCEDURE:

- Installed GIMP software from the official website,But I can use in Figma
- Created a mobile screen frame (rectangle) .
- Designed UI layout including header, search section, and bus listing cards.
- Added UI elements such as text fields, buttons, icons, and navigation bar.
- Organized each component into separate layers for easy editing.
- Created two different layout designs with different color schemes (Light and Dark theme).
- Exported the layouts as PNG images.

LAYOUT 1 :



USER FEEDBACK:

User Feedback *

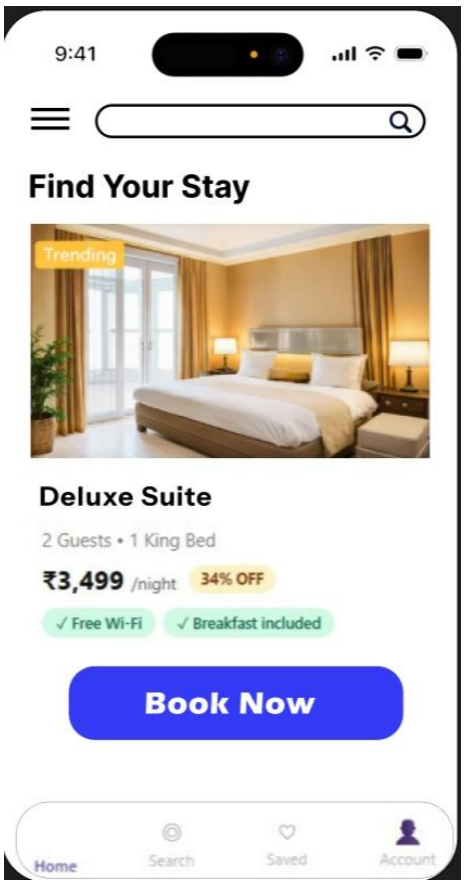
Very good

Improvement Suggestions *

Change color will be nice

FINAL RECOMMENDATION:

Preferred Layout: Layout 2 (Light Theme User Friendly) due to its modern appearance, better visual hierarchy, and engaging user interface.



CONCLUSION:

The experiment demonstrates that visual design and color schemes significantly affect user experience. Iterating designs based on feedback helps in selecting the most effective UI layout.
