EXPERIMENT-8

NAME: Santhosh Kumar N **ROLL NO: 240701807**

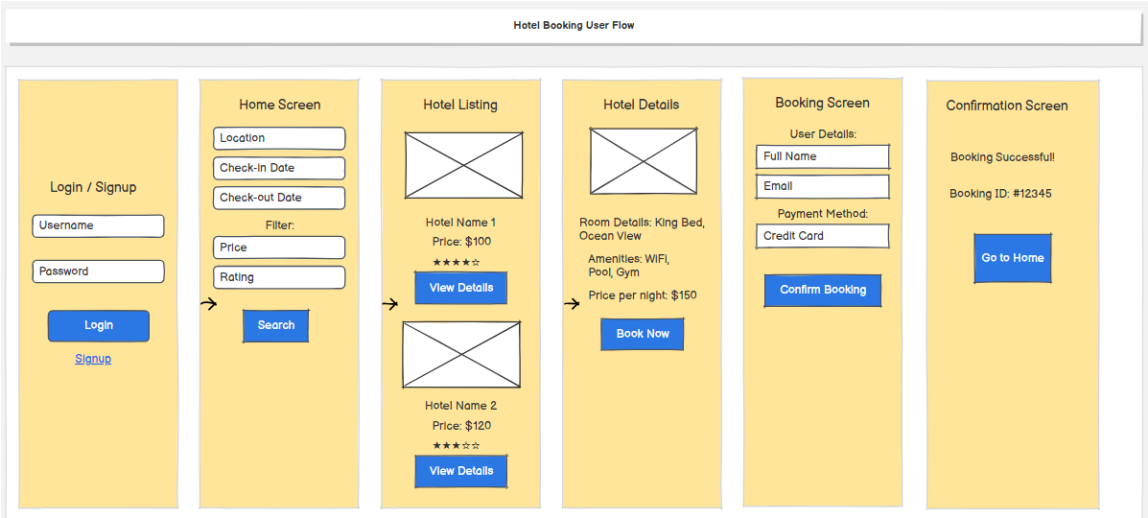
AIM:

To design and compare different bus booking mobile app layouts using Balasmiq

PROCEDURE:

- Installed Balasmiq software from the official website.
- Created a mobile canvas with size 1080 × 1920 pixels.
- Designed UI layout including header, search section, and bus listing cards.
- Added UI elements such as text fields, buttons, icons, and navigation bar.
- Organized each component into separate layers for easy editing.
- Created two different layout designs with different color schemes (Light and Dark theme).
- Exported the layouts as PNG images.

LAYOUT DESIGNS:



Hotel Booking System – User Flow Document

1. Introduction

This document explains the complete user flow of a hotel booking application. It outlines each step a user takes from logging in to successfully booking a hotel room.

---

2. User Flow Overview

The system follows this sequence:

Login / Signup → Home Screen → Hotel Listing → Hotel Details → Booking Screen → Confirmation Screen

---

3. Screen-wise Explanation

3.1 Login / Signup Screen

Purpose:

Allows users to access their account or create a new one.

Fields:

- Username
- Password

Actions:

- Login button
- Signup option for new users

3.2 Home Screen

Purpose:

Users search for hotels based on their preferences.

Inputs:

- Location
- Check-in Date
- Check-out Date

Filters:

- Price
- Rating

Action:

- Search button → Navigates to hotel listing

3.3 Hotel Listing Screen

Purpose:

Displays available hotels based on search criteria.

Details Shown:

- Hotel Name
- Price
- Rating (stars)

- Image (placeholder)

Actions:

- View Details button → Opens selected hotel details

3.4 Hotel Details Screen

Purpose:

Provides detailed information about the selected hotel.

Information:

- Room Details (e.g., King Bed, Ocean View)
- Amenities (WiFi, Pool, Gym)
- Price per night

Action:

- Book Now button → Moves to booking screen

3.5 Booking Screen

Purpose:

Collects user information and confirms booking details.

User Details:

- Full Name
- Email

Payment Method:

- Credit Card

Action:

- Confirm Booking button

3.6 Confirmation Screen

Purpose:

Displays booking success message.

Details:

- Booking Successful message
- Booking ID (e.g., #12345)

Action:

- Go to Home button

---

4. Key Features

- User authentication (Login/Signup)
- Hotel search with filters
- Detailed hotel view
- Secure booking process
- Booking confirmation with ID

---

5. Conclusion

This user flow ensures a simple and smooth hotel booking experience, guiding users step-by-step from login to confirmation.
