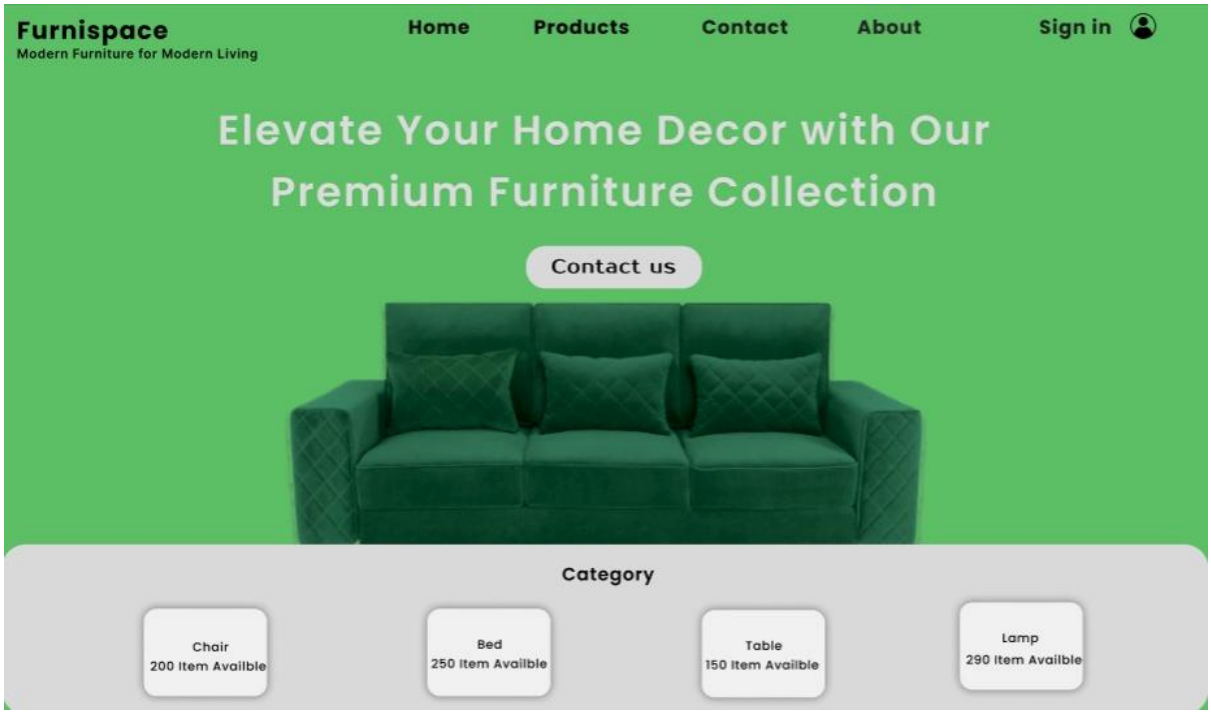
# USER INTERFACE AND DESIGN

COMAPARSION OF UI DESIGN BETWEEN TWO FIGMA CREATION

BAD WEBSITE DESIGN :

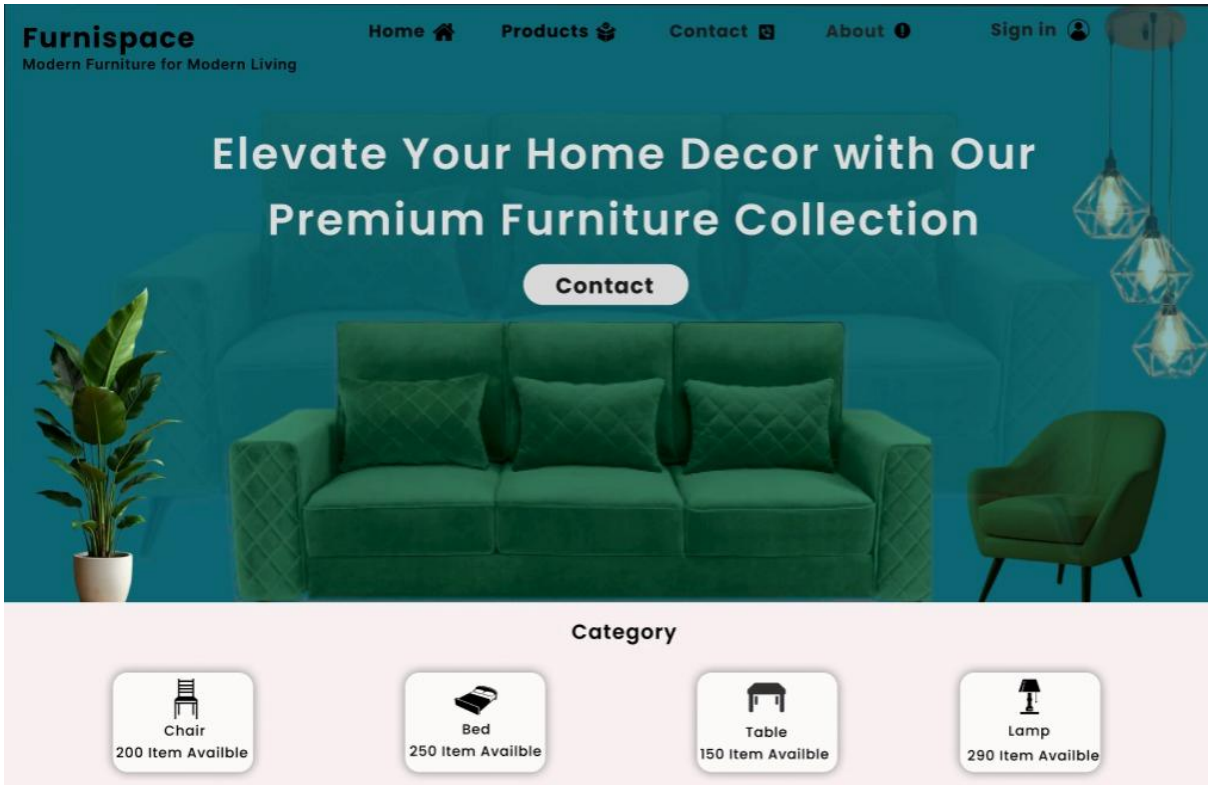


WHY IT'S BAD WEBSITE DESIGN :

1. **Poor Visual Contrast**
   - The green background and the green sofa are almost the same color.
   - This makes the main product blend into the background and reduces visibility.

2. **Flat and Dull Look**
   - The design looks very plain and lifeless.
   - There are no extra visual elements to attract the user's attention.
3. **Less User Engagement**
   - The call-to-action button ("Contact us") does not stand out clearly.
   - The overall design does not guide the user's eyes properly.
4. **Weak Visual Hierarchy**
   - Important elements like text, product image, and categories do not feel well separated.
   - Everything looks equally important, which is confusing for users.

GOOD WEBSITE DESIGN :



PROTOTYPE LINK :

https://www.figma.com/design/4DwB95wheaKqPPD8Ru91xR/240701807?node-id=0-1&m=dev&t=yVz6xaZBoFVaYJot-1

WHY IT'S GOOD WEBSITE DESIGN :

1. **Better Color Contrast**
    - The dark background makes the green sofa stand out clearly.
    - Text is easy to read and visually appealing.
2. **Attractive and Modern Look**
    - Decorative elements like plants, lamps, and icons make the design more lively.
    - The website looks more premium and professional.
3. **Clear Focus on Main Content**
    - The product (sofa) is clearly the center of attention.
    - The "Contact" button is more visible and inviting.
4. **Good Visual Hierarchy and Spacing**
    - Sections are clearly divided (header, hero section, category section).
    - Icons and cards improve usability and user experience.
5. **Better User Experience (UX)**
    - Users can easily understand what the website offers.
    - Navigation and categories feel more intuitive.
